## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-22, drawn to a panel and a LCD, classified in class 349, subclass 155.

II. Claims 23-35, drawn to a method of forming a LCD, classified in class349, subclass187.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method of claim 23 can be used to make a LCD with columnar or spherical spacers, instead of spacers having a tapered shape.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Further, Group I and Group II each contains claims directed to the following patentably distinct species of the claimed invention:

Group I

A(I): claim 20 drawn to a LCD wherein the first end of the at least one spacer has a larger surface area than that of the second end of the at least one spacer.

B(I): claim 21 drawn to a LCD wherein the first end of the at least one spacer has a smaller surface area than that of the second end of the at least one spacer.

Group II

C(II): claim 33 drawn to a method wherein the first end of each of the plurality of spacers has a larger surface area than that of the second end.

D(II): claim 34 drawn to a method wherein the first end of each of the plurality of spacers has a smaller surface area than that of the second end.

It is noted that the preamble of claims 33 and 34 is not consistent with that of claim 32.

Applicant is required under 35 U.S.C. 121 to elect a *single* disclosed species of Group I or Group II for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 1-19 and 22 are generic to A and B while claims 23-32 and 35 are generic to C and D.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 2871

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
